Every Jewish day begins at sundown the evening before. The dates are generated from the Hebrew calendar for the year shown; the chart can be rebuilt for any year.

Observance outside Israel. In Israel, Shemini Atzeret and Simchat Torah are one day (22 Tishrei), Passover lasts seven days (15 to 21 Nisan) and Shavuot is one day (6 Sivan).

Purim falls in Adar II in a leap year. Only holidays with fixed Hebrew dates are listed; fast days and other days whose dates shift are left out.

Dates computed with the fixed Hebrew calendar rules and checked against an independent Hebrew calendar library.
